PROFESSIONAL EXPERIENCE AND ACCOMPLISHMENTS

Technical Program Manager Amazon Web Service (Beijing, China) 2015 to Present

- Develop and manage business-impacting projects that enhance AWS infrastructure and its operations. Timely execution with the highest degrees of security, performance, availability, and reliability.
- Act as a bridge between infrastructure teams on the ground and business teams to ensure that our stringent standards are met in the most cost-efficient way possible.
- Drive significant initiatives to drive operational effectiveness and improve our customers' experience while maintaining their privacy. Look for areas to gain efficiencies, compress project delivery and reduce costs

Projects & Achievements

- In charge of all infrastructure builds in BJS/PEK regions including site design, construction, mechanical and electrical, power and cooling, network build etc. from planning to final hand off. Managing the life cycle of infrastructure from launch to retirement, liquidation etc.
- Managing all CDN/DX infrastructure builds around APAC as portfolio manager. Making delivery strategy, balancing priority/resources among projects worldwide and direct project managers around APAC to deliver the build in different country.
- Keep improving project management process and team collaboration to realize the vision of Just in Time Data Centre. Coordinated Colo vendor, business development team, planning team and onsite operation team to meet all the pull-in request in BJS region so far to satisfy increasing customer demands.

Senior Project Manager Ericsson Region North East Asia (Beijing, China) 2007 to 2015

- Drove tender, customer negotiation and execution of large-scale, multiple technology projects across region ensuring the successful E2E delivery according to baselines.
- Conducted project planning, scoping, costing, risks management, change control, problem solving, quality improvement, communication and subcontractor management etc. Introduced and implemented new processes during project delivery.
- Coordinated cross-project activities with commercial, sales, global product unit, local development team, site delivery team and support groups. Built up competence of engineer, solution architecture and project managers with resource owners.

Projects & Achievements

- China Mobile Research Institute – NFV virtualized IMS (IAAS) project. Directed the efforts of sub-project managers, system architects, developers, and system integrators to pass trail test with limited global support. Kept Ericsson in the engagement of China Mobile telecom cloud transformation with positive feedback from customer. Built up local resources' competence of cloud by leveraging the possible channels and team self-learning.
- Hong Kong SmarTone VoLTE (Voice over LTE i.e. 4G) Project. Served as program director to

negotiate scope, beat competitors, secure contract finally. Led a cross-functional team of over 40 members to realize and deploy this complex solution integrating with 2G/3G/4G. Ericsson first commercial launched VoLTE in this region. Achieved 15% margin improved, shared as best practice and contributed to Ericsson's VoLTE blueprint. Developed AP/GW solution (AIS, Linux, Oracle, MySQL, C/C++, JAVA, Tomcat, struts2, Mina) which have been reused by 4 different markets. Helped SmarTone become one of the first authorized Iphone6 operators around the world.
