PROFESSIONAL EXPERIENCE AND ACCOMPLISHMENTS

Technical Program Manager   Amazon Web Service   2015 to Present

➢ Develop and manage all infrastructure projects in BJS/PEK region to enhance infrastructure and its operations including new data centre design, construction, mechanical and electrical equipment, power and cooling, network deployment, existing site expansion and rework etc.

➢ Act as a bridge between infrastructure teams on the ground and business teams to ensure that stringent standards are met in the most cost-efficient way. Successfully handled all pull-in requests so far to meet high customer demands in BJS region.

➢ Manage CDN/DX infrastructure builds (new site, expansion, refresh, network scaling) around APAC as portfolio manager. Define delivery strategy, governance projects owned by different project managers around APAC, prioritize resources and escalate key issues to Seattle.

Projects & Achievements: BJS region expansion & New Site, PEK Site Exit & Migration.

Senior Project Manager   Ericsson Region North East Asia   2007 to 2015

➢ Started from access level project manager to senior level by delivering increasingly complex projects and passing certification program step by step. Selected as role model mentoring project managers in 3 project offices transferring to new way of project management.

➢ Successfully managed over 18 projects/programs end to end for different operators in China, Tai Wan, Hong Kong, Japan and Singapore including creating SOW, planning, scoping, costing, controlling, managing changes, risks, stakeholders, supplier/subcontractor etc.

➢ Contract value ranged up to 10M USD. Solution areas involved network rollout, business and operation consulting, system integration, software development of different scales.

Projects & Achievements: Hong Kong SmarTone VoLTE (Voice over LTE i.e. 4G) Project. Served as program director to negotiate scope, beat competitors, secure contract finally. Led a cross-functional onsite team of over 40 members to realize and deploy this complex solution integrating with 2G/3G/4G. Ericsson first commercial launched VoLTE in this region. Achieved 15% margin improved, shared as best practice and contributed to Ericsson's VoLTE blueprint. Developed AP/GW solution (AIS, Linux, Oracle, MySQL, C/C++, JAVA, Tomcat, struts2, Mina) which have been reused by 4 different markets. Helped SmarTone become one of the first authorized Iphone6 operators around world. Check out another 15 projects

Team Lead,   Crossbow Technology Inc.   2006－2007

➢ Drove firmware development and migration among different hardware platforms for machine to machine solution to meet different customer requirements.

➢ Coordinated software and hardware team customizing solution for mine and land monitoring.

Projects & Achievements: Platform Migration, Auto-Testing System, Land Monitoring

Technical Project Manager, Lucent Technology Inc. 1998－2001

➢ Started as an engineer deploying 5ESS (#5 Electronic Switch System) and gained technical reputation very soon, then led projects technical troubleshooting and contractor training.

➢ Successfully delivered very large scale network rollout in 3 different big cities as a technical project manager in charge of planning, logistics, installation, acceptance and handover etc.

Projects & Achievements: PHS rollout, One Tel Australia MSC, and Network Migration

Awards
